Office Action Summary	Application No. 09/552,823	Applicant(s) PACIFICI ET AL.	
	Examiner Zohreh A. Fay	Art Unit 1618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1618

Claims 1-7 and 12-14 are presented for examination.

The remarks filed on March 3, 2006 have been received and entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 5-7 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hibi et al. (U.S. 5,977,125) in view of Lund et al. (U.S. 4,621,100).

Hibi et al. teach the use of retinoid receptor agonists for the treatment of osteoporosis. See column 2, lines 7-15 and column 24 lines 42-45. The above reference differs from the claimed invention in the use of the compound for the treatment of conditions such as bone fracture. Lund et al. teach that osteoporosis typically results in numerous symptomatic manifestations, including back pain, femoral neck fracture, colles fracture and deformation of back bone. See column 2, lines 31-36. It would have been obvious to a person skilled in the art to use the claimed retinoic receptor agonists for the treatment of bone fracture, considering that the secondary

Art Unit: 1618

reference teaches, osteoporosis results in symptomatic manifestation such as bone fracture.

One skilled in the art would have been motivated to combine the teachings of the above references, since one relates to the use of retinoic receptor agonists for the treatment of osteoporosis and the other relates to bone fractures as symptomatic manifestation of osteoporosis. To use a compound being used for the treatment of osteoporosis, and use it for the treatment of bone fracture is considered to be within the skill of artisan, considering that bone fracture is a symptomatic manifestation of osteoporosis. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-7 and 12-14 are properly rejected under 35 U.S.C. 103.

The newly submitted references necessitate the new ground of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
